

Committed to Excellence

About Company

MTL Pipes India Limited, is a company promoted by Manik Group having business interest in the areas of Spiral/Helical Submerged Arc Weld Mild Steel Pipe and Coating System.

MTL Pipes India Limited main business line includes manufacturing of large diameter Spiral / Helical SAW MS Pipes with various coating on it catering to its esteemed clients throughout India. Our company's product is useful for infrastructure, irrigation, drinking water projects and river linking projects.

MTL Pipes India Limited has its plant located in the Industrial Hub of Madhya Pradesh at Pithampur near Indore, the Commercial Capital of Madhya Pradesh

The company manufactures Spiral M.S Pipe from 24"(600 MM) to 128" (3250 MM), thickness from 4 MM to 16MM with installed capacity of 1,00,000 MT per annum.

MTL Pipes India Limited is equipped with the latest and the most advanced facility for manufacturing large diameter Spiral/Helical SAW MS Pipes on two automated welding lines with various type of anti corrosion coating systems under one roof.

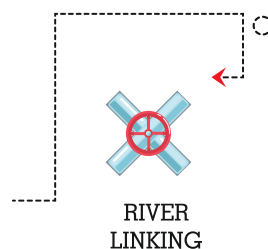

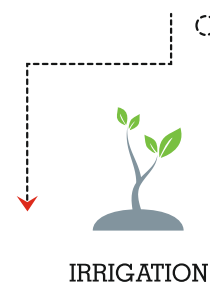

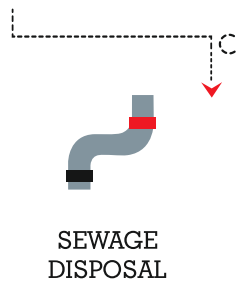

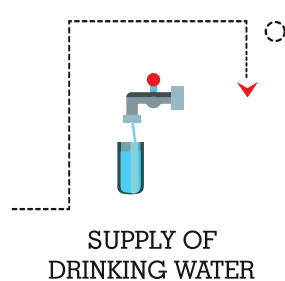

Our constant Endeavour is to produce pipes of highest quality and sustainability. To achieve this, we stick to strict quality standards, continuous in-house evaluations and training of our workforce.

MTL Pipes India Limited is capable to cater various Specifications of **IS-3589, IS 5504**. Our company is accredited with ISO 9001, ISO14001, OHSAS 45001 and BIS certification.

MTL Pipes India Limited and its Quality Products will be soon accepted globally by all reputed companies and EPC contractors. The Company is backed by state-of-the-art technology know-how and highly motivated & skilled workforce, which will enable us to achieve significant growth in the coming years

Core Values

MTL Pipes India Limited Management has always Committed to Excellence and sought to be a value-driven organization. These values continue to direct the company's growth and business. The core values underpinning the way we do business is with **Integrity, Ethics, Excellence and Responsibility**

COATING FACILITY

- To prevent corrosion and to improve the flow of water, pipes are coated internally with Liquid Epoxy or with polyethylene and external with PE / CTE / FBE & CWC on most advanced systems in the thickness ranging from 100 microns to 1000 microns.
- We offer coating of pipes in the range from 24"(600 MM) to 128" (3250 MM) , with Annual production capacity of 3 million sq meter per annum.

Coating Process

- For adequate roughness on surface, pipes are shot blasted with mixture of shots and Grits through rotatory turbine. Once required roughness is achieved, pipes are shifted to automated painting system for internal coating. Through rotary spray head epoxy/polyethylene mixtures uniformly applied on the inside surface from one end to the other end. To achieve required thickness, coating is performed in single or double layer depending on thickness of coating. The pipe is rotated on rollers till curing. The quality control department ensures the thickness and binding of application on pipes through various apparatus.

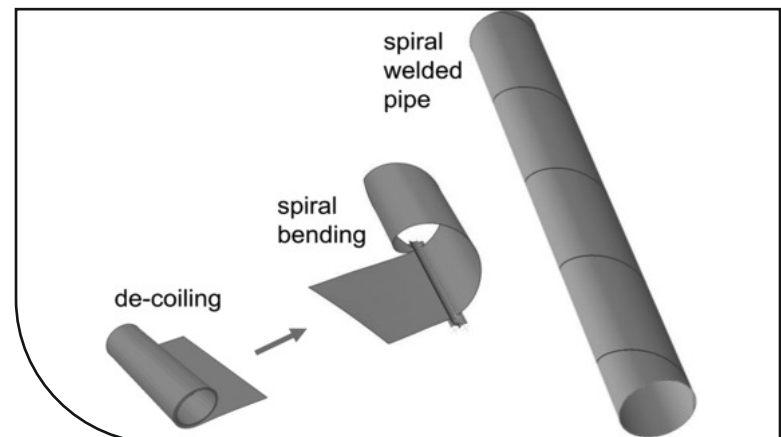

Quality Assurance

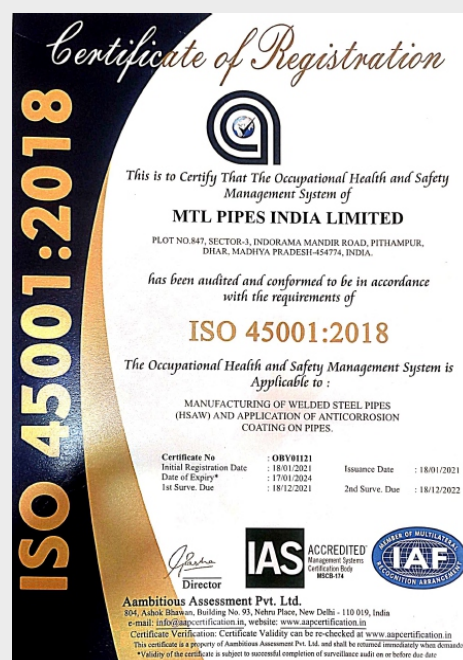

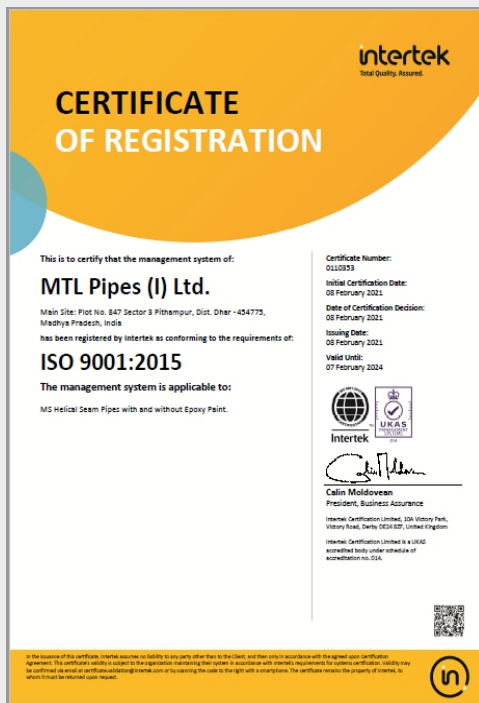

MTL Pipes India Limited believes in total quality management with zero error manufacturing. We all are committed to our tag line COMMITTED TO EXCELLENCE. through quality systems.

The company adheres all quality standards by rigorous implementation of process involved in manufacturing of pipes and coatings. We undertake all testing of raw material consumables before putting them to use and follow standard operating procedures specified. Our company also follows all certification norms of ISO 9001, ISO 14001, ISO 45001 and BIS norms. To ensure rigorous quality checks including hardness test, flattening test, tensile test and drift test, company has installed in-house laboratory with destructive and non destructive testing to ensure quality and error free product.

Values

- Becoming a market leader in all the sectors we operate in.
- Maximizing shareholder value.
- Building strong professional partnerships with our associates.
- Providing able support and service to our esteemed clients.
- Building a pool of happy, motivated and capable employees for sustainable business growth.

Health & Safety

MTL Pipes India Limited is committed towards health and safety of its employees, and safe work place enriched quality life. To ensure no air pollution company created green environment in and around the campus and done plantation in 20% of its land. MTL Pipes India Limited campus is zero waste water discharge with 10 MLD sewerage plant.

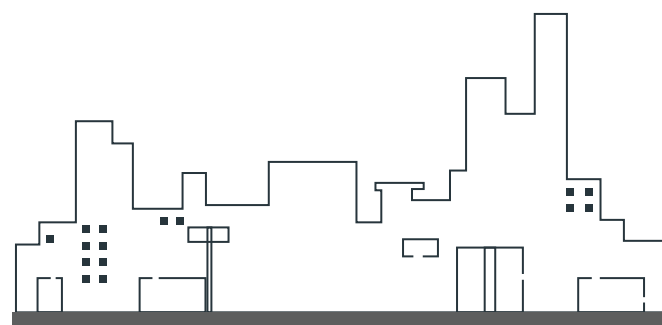

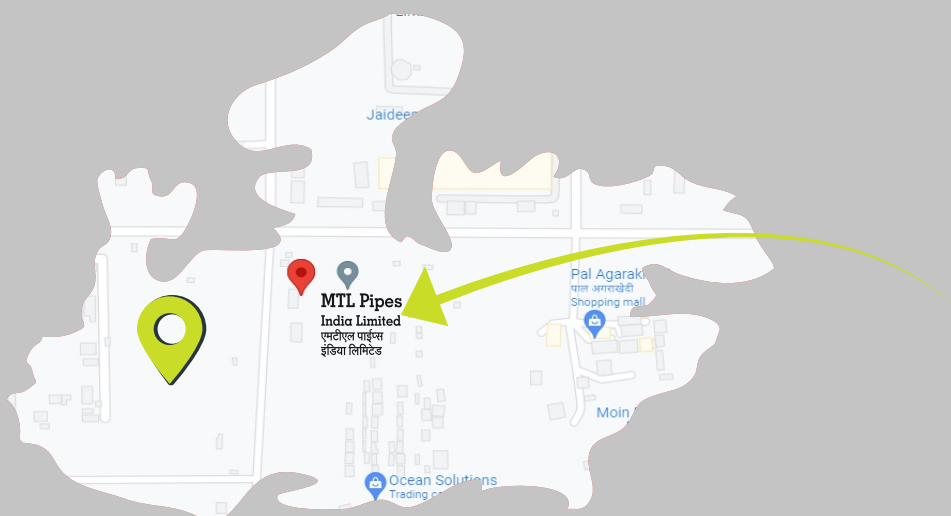

Management's desk

What began as a career move about four decades ago not take long to morph into a fulfilling passion for us. Manik Group have been in manufacturing business ever since and have had tremendous growth in stature on the industrial landscape, over the years, has been a source of huge satisfaction !!

Thanks to the continued support of the team, mentors and well-wishers, we have since embarked upon pursuing our own niche also in the form of MTL Pipes India Limited . The Group is planning an ambitious growth with business units in India.

At MTL Pipes India Limited, passion for creating value in our commercial endeavors will continue to be accompanied by equal emphasis on operating as a positive Corporate Citizen contributing respectable value to the Society. At the core of our existence will be our Human Resources, our Team Members each of whom will feel respected and suitable empowered to work joyfully and with a shared passion for excellence in delivering value to the Group and the Society.
